

THE COMPANY

With its versatile, state-of-the-art and efficient manufacturing capabilities, high flexibility, well-trained team and many years of expertise, BLECHTECH AG offers you the opportunity to procure sheet metal products and assemblies in a high value chain from a single source.

As a full-service provider, our services range from consultations, finding solutions, development, production and surface treatments to, and including, logistics – the complete service package under one roof.

OUR RANGE OF SERVICES

We produce individual solutions for industry, architecture, objects for advertising technology and shop fittings. The broad spectrum includes mechanical engineering, the chemical industry, food and packaging industry, rail vehicle construction and other sectors. We manufacture components or entire installations and take into account the individual requirements of the respective industry.

With products intended architectural purposes, the core focus is on the design and quality of the material. Objects used in advertising technology and special solutions must satisfy some very high requirements in their processing and finishing. For the most part they are products that have to make a good impression through their material and detailed processing.

Mechanical engineering | Plant construction

WE ARE THE PARTNER WHO GIVES YOUR IDEAS SHAPE

We make products from sheet metal, mechanical assemblies or entire plants for our customers. We use modern and versatile machinery for every job. We develop and produce according to your individual wishes and requirements.

TESTIMONIALS

RÉMY VILS, ALVICO VILS AG

A meeting at 6am, we received the offer at noon – production starts reliably within a reasonable time. It's a pleasure working with BLECHTECH.

PATRICK GUTKNECHT, SIMPLIFY

Their advice relating to welding matters and the completion including the quick purchase of mechanical parts is unsurpassed.

FUTURE

In recent years, BLECHTECH AG has invested heavily in modernising its machinery, optimising its production processes obtaining permits and certificates as well as training skilled specialists. This has enabled us to significantly increase our range of services, flexibility and capacity. We are able to cater for high demands and ambitious visions.

Rail Vehicle Construction

SHEET METAL COMPONENTS FOR RAIL VEHICLE CONSTRUCTION

BLECHTECH AG is a certified manufacturer of rail vehicle parts (EN15085, DIN6701). Our certification to “weld” and “bond” rail vehicle parts makes us a competent partner for the rail vehicle industry. Specially trained employees and the latest production facilities are ready to manufacture a whole variety of assemblies and components for rail vehicles.

Advertising technology | Display | POS

WE DEVELOP AND PRODUCE FINISHED PRODUCTS

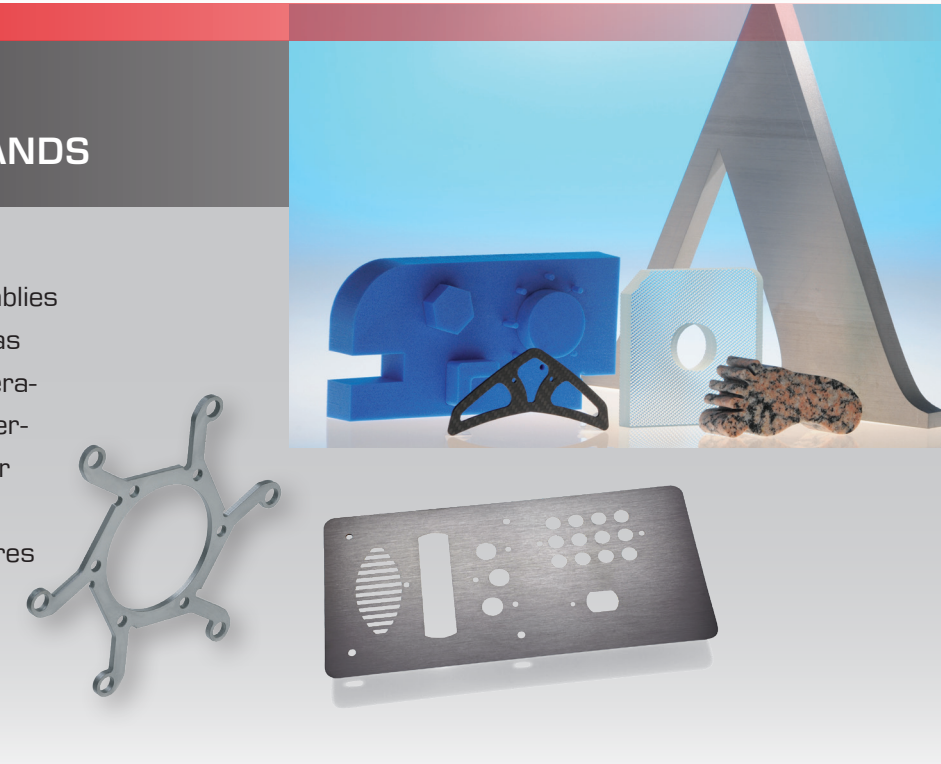

BLECHTECH AG develops and makes POS elements, displays and product mounts according to your wishes. Our design specialists support you in the planning and technical realisation of your products. We visualise your expectations in 3D and provide you with the basics for further discussions with your end customer.

Outsourcing

INDIVIDUAL PARTS TO MEET THE HIGHEST DEMANDS

We are partners in the production of assemblies made from the most varied materials such as metal, plastic, foam materials, stone and ceramics. We attach great importance on the perfect execution and processing quality of your products. In addition to this, we offer special procedures such as precision cutting, 3D laser cutting and 3D laser welding.

BLECHTECH AG is one of the most efficient suppliers in Switzerland for the design and production of products made from sheet metal and mechanical assemblies. We have been able to strengthen our favourable position in the market even further through significant investments.

ADVANTAGES OF THE LOCATION

- Located in Zurich's Weinland region near Rhine Falls means a route free from congested traffic
- Large amount of space for production and logistics
- Loading under the protection of a roof
- Scope to extend production facilities

OPTIMISED OFFER

- Versatile and efficient production options
- High capacity for demanding schedules
- The latest machines and equipment

RANGE OF SERVICES

- Consultation and development of products made from sheet metal
- 2D/3D Laser cutting and welding
- Precision laser cutting
- Punching
- Water jet cutting
- Automatic deburring and grinding
- Vibratory finishing and barrel finishing
- Rounding edges
- Welding
- Powder coating incl. pretreatment, Alu chrome-free passivation and steel zinc-phosphatising
- Assembling incl. bonding
- Logistics

Water Jet Cutting

Fibre laser, fully automated sheet metal warehouse

2D/3D Laser Cutting and Welding
